SUMMARY

Security analyst with experience investigating events across EDR, SIEM, firewall, and email platforms in a financial services environment. Skilled in host and log analysis, malware triage, and phishing investigations, with a background in compliance frameworks including NIST CSF, ISO 27001, and GLBA.

TECHNICAL SKILLS

Scripting and Query: PowerShell, Bash, KQL

SIEM and EDR: SentinelOne, Microsoft Defender

XDR, Rapid7

Operating Systems: Windows, Linux

Email Security: Mimecast, KnowBe4

Network Analysis: Wireshark, Malcolm

Forensics: Autopsy

Frameworks: MITRE ATT&CK, NIST CSF

PROFESSIONAL EXPERIENCE

Security Analyst – Centier Bank | Merrillville, IN

Jun 2024 – Present

- Investigate security events across EDR, SIEM, firewall, and email platforms, performing host and log analysis spanning phishing, malware, account compromise, and insider activity.
- Coordinate with infrastructure and help desk teams during incident remediation and produce incident timelines and reports for internal stakeholders.
- Developed a PowerShell script to reconcile asset records across endpoint management, EDR, and internal asset register platforms, identifying hundreds of unaccounted assets and uncovering devices lacking critical security controls.
- Support audit and compliance activities by collecting evidence for internal and external reviewers, coordinating with penetration testers, and tracking remediation of findings to validate security controls.

Digital Security Consultant – Crowe LLP | Chicago, IL

Aug 2023 – May 2024

- Conducted due diligence investigations for a major payment processor, screening merchant clients for KYC, AML, sanctions, and financial crime risk using commercial intelligence databases; selected for enhanced due diligence tasks with the client's most sensitive cases based on report quality and accuracy.
- Assessed controls for large financial institutions against NIST CSF, GLBA, and ISO 27001 frameworks, producing gap analyses and remediation recommendations that guided client security programs.

PROJECTS

Blog (blog.carsonshaffer.me)

- Publish technical writeups for TryHackMe and Hack The Box challenges covering topics like network traffic analysis, incident response investigations, and penetration testing.

National Cyber League Competition (Experienced Bracket)

- Spring 2026 Team: Ranked 3rd of 341 teams
- Spring 2026 Individual: Ranked 14th of 466 competitors

CERTIFICATIONS

- GIAC Certified Incident Handler (GCIH)
- GIAC Defensible Security Architect (GDSA)
- GIAC Security Essentials (GSEC)
- CompTIA Cybersecurity Analyst+ (CySA+)
- GIAC Strategic Planning, Policy, and Leadership (GSTRT)

EDUCATION

Master of Science, Information Security Engineering – SANS TECHNOLOGY INSTITUTE

2025 – 2028

Bachelor of Science, Computer & Information Technology – PURDUE UNIVERSITY

2019 – 2023
